

## Financing Application Instructions

Customer Financing is now available from within your ProEstimator Account. There are a few simple steps the shop must take to be able to offer this option to their customers.

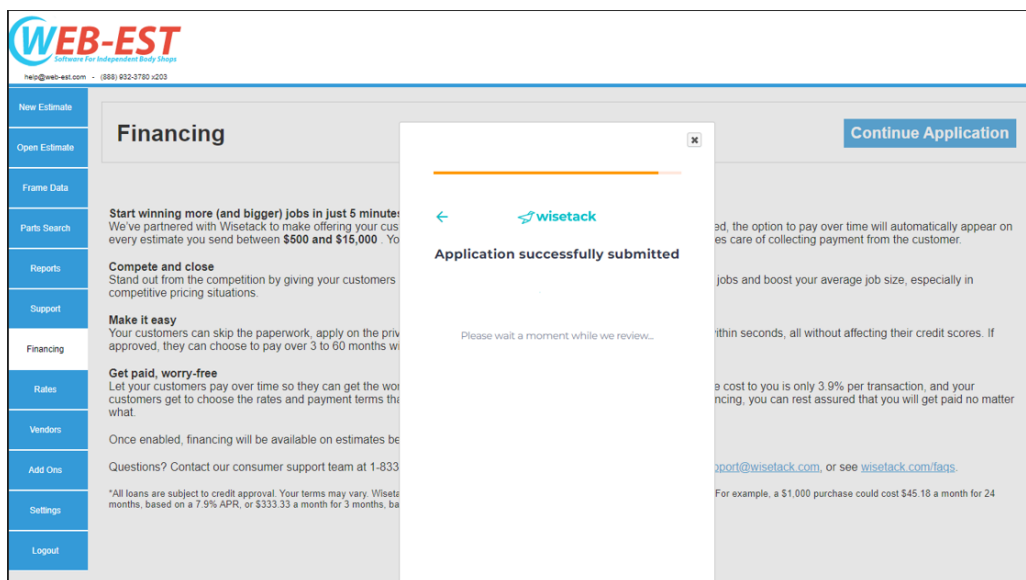

First, the shop will access the Financing page on the left sidebar of their account. The next step will be to select the “Sign Up Now” button at the top of this page.

This will start the sign-up process by displaying a form the shop will fill out. Once completed, select the “Save & Continue” button. Repeat this process until the form is completed.

During the process, you will link your bank account, so that you can receive direct payment for the amount financed, once the repair is complete. Once the application process is completed, you will receive a notification that it was submitted successfully. The application submission may take up to 5 business days to process.

You will also receive an email to verify that your application is started.
