

Pro-Advisor User Guide – Operation

After you have created your estimate, when you add damage entries, you will see the Pro-Advisor Add On recommendations popup displayed. In this example we are replacing the hood. Your damage entry will be added to the estimate, then you will see your additional Add On recommendations displayed.

If you have chosen to have certain recommendations always selected (see the “Pro-Advisor User Guide – Rate Profiles” document), they will be displayed as highlighted in blue. To add any additional charges, simply select them by clicking or tapping the listing to also highlight it in blue. To deselect an item, simply click or tap on it again to remove the blue highlight.

To add them to the estimate, select the correct button at the top of the screen. In most cases, you will select the button named “Accept Selected”. You can also choose to select “Accept All” or “Reject All”.
