

How to use the Parts Search feature on the Add Parts page.

1. After you have opened your estimate, and entered the Owner & Vehicle information, navigate to the “Add Parts” page. ***You must enter a vehicle, as this search is only for parts listed for a particular vehicle.

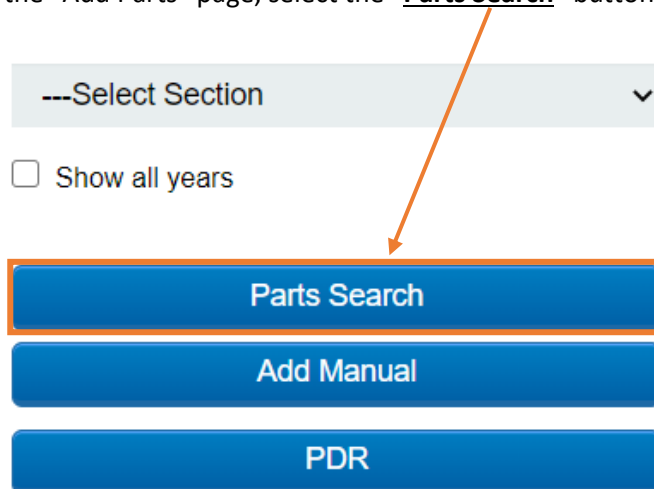

- a. From a “**PC**”:

- b. From a “**Mobile Device**”.

2. On the “Add Parts” page, select the “Parts Search” button.

3. You have 2 choices for the type of search you want to perform. One is a “Part Number” search and the other is a “Description” search.

Description Part Number

4. For a “Part Number” search, simply enter a Part Number in the “Part Number” field, then select the “Search” button. For best results, you must enter the entire part number. Dashes and spaces are not required. (It is not necessary to have a parts section opened for the search.)

Description Part Number

5. You will see the initial search results. If there are multi-options for that part, select the correct listing, then select the “Add Part” button.

Current Estimate 10007671 | Estimate # 3166 | Open | | 2019 Ford -Mustang GT

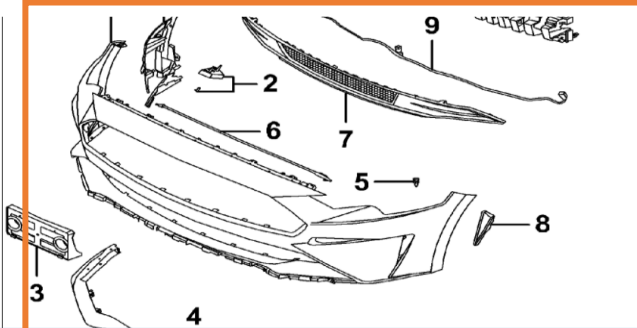

Description Part Number

Section Name	Part Count	Part Description	Detail Count	Part Text	Part Number	Price
Front Bumper	1	front bumper cover	4	frt bumper cover ecoboost, ecoboost premium model w/o performance pkg	jr3z 17d957 captm	603.21
				frt bumper cover ecoboost, ecoboost premium model w/performance pkg	jr3z 17d957 captm	603.21
				frt bumper cover gt model w/o performance pkg	jr3z 17d957 captm	603.21
				frt bumper cover gt premium model w/o california special pkg w/o performance pkg	jr3z 17d957 captm	603.21

6. Notice that when the parts search feature is closed by either adding the part, or selecting to close the Parts Search feature, that the graphical section for that part is displayed. You can then add any additional parts or continue to use the Parts Search feature.

Action: Part Source: Side: 2 Stage

Please select a parts section

		side cover reinforcement	2			
		valance clip	1			

In this example, notice the search term is “Bumper”. This will pull up all parts with the word “Bumper” in their name. Using a keyword search will give much better results than trying to type in the exact part name. Different manufacturers use different terms for their parts, so a single keyword will provide a much more productive search result.

The initial search will produce results into the “Section Name” field. Select the correct section, then the “Part Description” field will appear with the narrowed results. Once you have made your selection in the “Part Description” field, the “Part Text” field will give you a list of the possible correct selections, if more than one option is available.

If you close the parts search at this point, the graphical images for that part selected in the “Part Text” field will display, the same as when using the “Part Number” search.
