To be able to offer financing to your customers, click on the financing tab on the left side of your screen. You will enter this screen where you will be able to click the sign-up button below. Fill out the sign-up form to get your shop approved. Approval may take up to 1-3 business days.

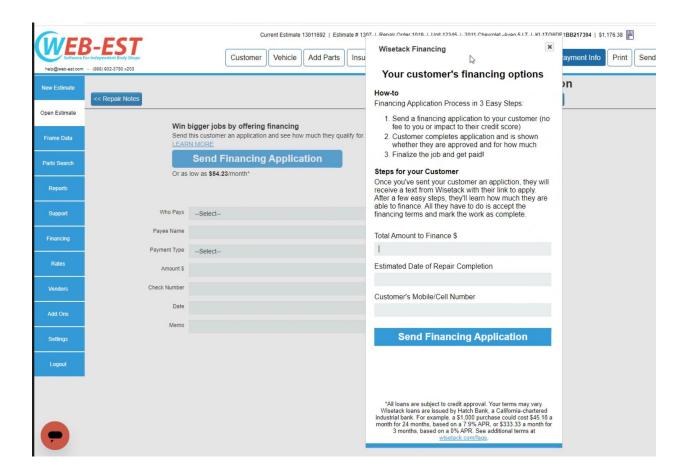

Once your shop has been approved you will now see this screen below. This screen will allow you to track all your customers' financing requests. In the example below you can see some of the statuses of the loan process, including when the loan has been approved and your shop has been paid by Wisetack.

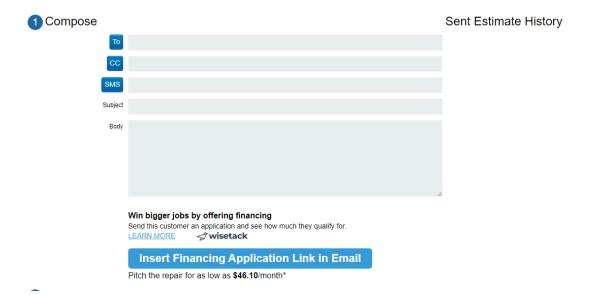

The first way to send a finance request to your customers is to click on the "Payment Info" tab at the top of the page while in your estimate. In this page you will see a "Send Financing Application" button. After you click on this button you will be prompted to enter the Finance amount, estimated date of repair

completion, and your customer's cell number. Once you send the finance application your customer will receive a text with the request. They can then click on the link they receive and apply for financing.

Below the "Send Financing Application" button, you will now see updates of your customer's loan request.

The other way you can send your customer a finance request is via email. Navigate to the "Send Estimate" tab at the top of the page while inside your estimate. Below the email body you will see a "Insert Financing Application Link in Email" button. This will send the financing application link in the email you send to your customer.

Lastly you can include a link in the estimate you send to your customer. You will need to make sure the box is checked that says, "Include Financing Application Link". Once you attach the estimate to the email when this box is checked the link will appear in the PDF.
